

FIA

FIA wall light is a low maintenance, mains-free lighting solution with a stylish, architectural finish. Lantern-inspired form with a matt black aluminium frame and clear glass lens design. Suitable for a range of property types: from modern to traditional builds. Crafted for long term performance without the hassle of wiring. Powered by a built-in monocrystalline solar panel that charges the internal battery throughout the day. As daylight fades, an integrated sensor automatically activates the LED solar filament bulb, delivering 200 lumens of warm white light (2700K) for up to 10 hours from a full charge.
