

COASTAL

The Coastal PIR up and down wall light is constructed from black hard-wearing polycarbonate, making it a durable lighting solution that will not corrode, ideal for coastal areas with harsh high salt environments. The twin GU10 lamp holders illuminate the mounting surface and highlight features such as stone or brickwork, a lighting effect that looks brilliant when used with coloured LED bulbs. The integrated PIR sensor is packed with features including adjustable PIR detection range, adjustable LUX and adjustable time.
