

PRIMA

The LUTEC PRIMA solar hybrid wall light combines a refined cube design with energy-efficient technology to create a compact, modern lighting solution for exterior spaces. Its angular form and dark grey finish give it a clean architectural look, while the adjustable head allows for 360° light and enables you to customise the direction of the lighting effect. The Prima uses a high efficiency monocrystalline solar panel to capture daylight, supported by hybrid functionality that will switch to mains power when required. This allows consistent and reliable illumination throughout the year while the integrated opal diffuser produces a 400 lumen warm white (3000K) glow. Ideal for entrances, pathways and outdoor areas.
